

Phil Broadhead OBE

Speaker, chair and moderator on government, cities and capital.

15 years in government

4 Prime Ministers
worked with

£3bn+ regeneration
pipeline

Dozens of conferences
spoken at and hosted

Biography

Phil is a Dubai-based adviser to governments and investors on urban delivery, infrastructure, public-private partnerships, health, education and UK-Gulf policy. He spent 15 years at the heart of UK government, attending Cabinet and serving as Leader of Local and Regional Government for the UK. He led a large city region on England's south coast and chaired FuturePlaces, one of the UK's largest urban regeneration companies, with a £3bn+ pipeline. He has worked closely with four Prime Ministers.

An experienced speaker, chair and moderator, Phil has spoken at and hosted dozens of conferences, including national government conferences. He has appeared on the BBC, Sky, ITV and most major news broadcasters, and has been featured in the New York Times. He was appointed OBE for public service in 2026.

Formats

Keynote. 15 to 30 minutes, setting the frame for a day or a track.

Panel. A government and investor view, plainly put.

Chair and moderator. Panels and full conference days, from government sessions to investor roundtables.

Fireside conversation. On either side of the chair.

Roundtables and private briefings. Closed-door sessions for boards, chambers and delegations.

Media commentary. Broadcast and print on Gulf, UK and policy stories.

Topics

Government and delivery. How governments turn national strategy into results on the ground: devolution, city leadership and public service reform.

Cities, regeneration and infrastructure. Master plans residents actually notice, and the institutions that build and run them.

Capital and partnerships. Public-private partnerships that outlast the launch, and what shifts in UK policy mean for Gulf investors.

Health and care. Building health and care systems, and the workforce to run them.

Education. Schools, universities and the infrastructure, including housing, that brings students and teachers in and keeps them.

AI and digital government. What governments get right and wrong when they adopt AI, from someone who led a city's digital transformation.
